

XLR8® Bio

XLR8® Bio is a probiotic formulation combining the key technologies pioneered by VRM Biologik® for soil enhancement and nutrient management. This product helps stimulate biological reactions in soil which enhance carbon sequestration and biological nitrogen fixation. With continued use, this activity contributes to humus building and enhances mycorrhizal activity in the critical root zone. Regular use of XLR8® Bio stimulates the natural biological activity responsible for water manufacture in soil. XLR8® Bio is best used in tandem with VRM Biologik®'s HumiSoil®.
